EVOA Powers Forward with Success Following Miami International Boat Show and Long Beach Electric & Hybrid Marine Expo

Orlando, FL - EVOA, a pioneering force in electric marine propulsion, continues its triumphant journey following the successful unveiling of its latest collaboration, the Supra EV550, at the Miami International Boat Show. They also showcased their acclaimed E1 Propulsion System at the Electric & Hybrid Marine Expo North America Exhibition and Conference in Long Beach, California. Both events signify important milestones as EVOA joined forces with its performance partner, YASA, renowned for its industry-leading solutions.

Mike Anderson, EVOA's managing partner and founder, emphasizes the significance of the Electric & Hybrid Marine Expo North America in advancing the company's strategic growth trajectory. *"The importance of the Electric and Hybrid Marine show is evident by the level of exhibitors and the quality of attendees."* He continues to say, *"Never have I experienced a show with a medium attendance rate bring in so many qualified contacts. It's the perfect speed dating environment for anyone involved with electrification in the marine segment."*

EVOA shows no indication of slowing down anytime soon, welcoming participants to explore its pioneering advancements alongside its partner, YASA, at future events like the Electric & Hybrid Marine Expo Europe this summer, and subsequent gatherings planned for later this fall and winter including the Monaco Yacht Show, IBEX, and the Dusseldorf Boat Show. For those that are unable to attend, inquiries may be directed to info@evoae1.com, or visit the company's official website at www.evoae1.com for more information.

YASA is a wholly owned subsidiary of Mercedes-Benz.
